

Subject: **Touch Medix, LLC Announces the Appointment of Stephen Miley, MD FACEP as Chief Medical Director, Executive Vice President of Development**

**Woodland Hills, California – August 1, 2010** -- Touch Medix, LLC, a provider of charting solutions and emergency department information systems (EDIS) is pleased to announce the appointment of Stephen Miley, MD, FACEP, a Board Certified Emergency Physician, as Chief Medical Director, Executive Vice President of Development.

Dr. Miley is well respected in Emergency Medicine and has 30 years of experience in healthcare, specifically in the EDIS environment. As Chief Medical Director, Executive Vice President of Business Development, Dr. Miley will be responsible for the advancement and expansion of Touch Medix product lines and the customer network.

“Touch Medix has focused on the development of unique and robust documentation (charting) software and EDIS suite of products. Dr. Miley brings extensive experience in both healthcare and business development. His expertise and vision will boost the company’s expansion and drive our product technology to levels beyond the existing market,” said John Uphold, MD, FACEP and Chief Executive Officer of Touch Medix.

Dr. Miley is a graduate of University of South Florida College of Medicine and holds certifications from the American Heart Association, the American Board of Emergency Medicine, the American Board of Quality Assurance & Utilization Review and the American College of Surgeons. He is the founder of Physician Computer Systems, Inc., a developer of software for automation of physician’s offices. He is also the founder and Managing Director of Axxcess Medical Imaging and the founder, Chief Executive Officer and Chairman of MedHost Inc., a software development company for the healthcare industry. In his many years as a physician Dr. Miley has held numerous hospital affiliations and directorships at facilities such as St. Joseph’s Hospital, Lykes Memorial Hospital, Manatee Memorial Hospital, James E. Holmes Regional Medical Center, Palm Bay Family Medical Services and Bon Secours Venice Hospital. He is currently a member of the emergency medical staff at Doctors Hospital in Sarasota, Florida.

“I have the distinct honor to re-enter the physician software market with the Touch ED product which I know is the best designed, most stable, full featured and easiest to use physician and nursing ED documentation software available on the market today. I look forward to helping the company expand its product line and achieve the success and market share it deserves,” said Dr. Miley.

Touch Medix, LLC, is a physician-led company that develops innovative medical software products that are intuitive, fast and easy-to-modify documentation solutions for physicians, nurses and other practitioners. Their Touch ED EDIS product creates and controls charts by touch screen and voice activation or conventional keyboard input allowing easy, effective and accurate documentation management. One hundred percent use of your documentation to effectively treat illness and preserve health is a measure of our success; nothing less.
